FOR IMMEDIATE RELEASE

SOUTHWORTH REDESIGNS DANDY LIFT™ PRODUCT LINE

Grimsby, ON - Southworth Products has redesigned its Dandy Lift™ line of lifter/transporters for a higher level of convenience and comfort that makes work faster, safer, and easier in all industries.

For nearly 30 years, **Dandy Lifts** have set the standard for quality, performance, and overall value in foot-pump hydraulic lifter/transporters. Their hydraulics offer infinite height adjustment (within range) with a 20:1 mechanical advantage. Ergonomic improvements on every new model include:

- A **“Multi-Grip” Position Handle** with sure-grip cushioning and gentle contours that allow users to pick the most comfortable hand position for what they are doing — pushing, pulling, maneuvering, or raising loads.
- A **“Qwik-Grip” Lowering Handle** with an oversized, open-triangle design that makes it accessible from almost any position behind or beside the Dandy Lift.
- A **180° Access Foot Pedal** with a large, open-loop design that allows it to be pumped from different angles at the rear or side of the unit while providing solid contact regardless of footwear.

Dandy Lifts are available in seven models with a wide range of capacities (330 to 1,760 lbs.), lifting heights (29” to 49.8”), and platform sizes (17.7” x 28” to 23.6” x 39.4”). Configurations include single-scissor, double-scissor, high-lift, and heavy-duty. A low-profile model has a platform that descends to 3.2” from the floor and is available with forks for use with skids and plastic pallets. All units feature steerable caster-type wheels; parking locks; and attractive, colorful, enamel-and-chrome finishes.

For machine feeding and offloading applications, Southworth offers two redesigned models (330 and 1,100 lbs. capacity) of **Dandy Levelers**™ — portable auto-leveling platforms that minimize bending and reaching by keeping loads at comfortable working heights as items are added or removed.

Also available from Southworth Products is the **Powered Dandy Lift**, which lifts and lowers at the touch of a button thanks to a 24-volt battery. Powered Dandy Lifts are available in five models with capacities from 220 to 500 lbs., platform sizes of 20” x 31.5” and 24” x 36”, and raised heights to 51”.

Southworth Redesigned Dandy Lifts are available in Canada through Trans-Quip Inc. For further information, contact Rebecca Abray, Marketing Co-ordinator, 266 Kerman Ave. Grimsby, ON L3M 3W6, TEL: 1-866-261-0251, FAX: (905) 945-0062, email: swproducts@trans-quip.com, website: www.trans-quip.com.
